Werk

Head of QA Team

2019 - 2022

QA Engineer

2018 - 2019

- Manual functional, regression and exploratory testing of web applications (add-ons for Jira)
- Analysis and test design for functionalities under test
- Working with bugs: localization, creating bug reports, verification of fixes
- Creating and maintenance of test documentation (check lists, mind maps, knowledge base) in English
- Working in SCRUM team

QA Engineer

2014 - 2018

- Test planning, creating check-lists
 - Manual testing of new functionality, regression testing
 - Web application and desktop simulation modelling IDE testing
 - Communication with developer team
 - Participation in making of tasks list for the next release
 - Introduced and maintained the testing process in the project (was solely responsible for all test activities)
 - Initiated regular review of tasks lists for big releases that happened every 3-6 months in order to introduce necessary changes in the planned tasks and, as the result, significantly reduced the number of releases that were postponed due to unmet aims
