WORK EXPERIENCE

2019 TO 2022

Head of QA Team:

2018 TO 2019

QA Engineer:

- Manual functional, regression and exploratory testing of web applications (add-ons for Jira)
- Analysis and test design for functionalities under test
- Working with bugs: localization, creating bug reports, verification of fixes
- Creating and maintenance of test documentation (check lists, mind maps, knowledge base) in English
- Working in SCRUM team

2014 TO 2018

QA Engineer:

- Test planning, creating check-lists
- Manual testing of new functionality, regression testing
- Web application and desktop simulation modelling IDE testing
- Communication with developer team
- Participation in making of tasks list for the next release
- Introduced and maintained the testing process in the project (was solely responsible for all test activities)
- Initiated regular review of tasks lists for big releases that happened every 3-6 months in order to introduce necessary changes in the planned tasks and, as the result, significantly reduced the number of releases that were postponed due to unmet aims
